Art Unit: 2164

## **DETAILED ACTION**

1. Claims 1-30 have been examined.

## Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 3. Claims 1-20, and 22-30 are rejected under 112 2<sup>nd</sup> paragraph.
- 4. Claims 1, 11, and 22 are rejected because the relationship between "the data records" and "a data record" is unclear. It will be assumed for the remainder of this office action that a data record was to pertain to one of the data records.
- 5. Claims 7, 17, and 28 are rejected because they state "each data record" which is unclear if it is related to "a data record" or "the data records" from the claim upon which the respective claims are dependant. This will be interpreted as each of the data records for the remainder of this office action.

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2164

7. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Number 6978262, know hereafter as Tsai.

- 8. Claim 1 is rejected for the following reasons:
- 1. A system of data management for a plurality of correlated data records, comprising: a data verification module, verifying the data records according to the data correlations and producing a plurality of verification results), each of which corresponds to a data record(Col 4 lines 36-67, by parsing and returning the resultant records the search process verifies data); a data notation module, coupled to the data verification module, noting the verification results in the corresponding data records(Col 6 lines 36-45 storing how many times something has been accessed, ); and a data management module, coupled to the data notation module, managing the data records according to the verification results(Figure 4 item 41).
- 9. Claim 2 is rejected for the following reasons:
- 2. The system as claimed in claim 1, further comprising at least one data application module, coupled to the data verification module and the data notation module, applying the data records(Figure 1 item 21).
- 10. Claim 3 is rejected for the following reasons:
- 3. The system as claimed in claim 2, wherein the data correlations are established according to correlations between the data records applied to the data application modules (Figure 34 shows sample queries which establish the correlations in the results).

Art Unit: 2164

11. Claim 4 is rejected for the following reasons:

4. The system as claimed in claim 3, wherein the data correlations are sequential (Col 21 line 65-

col 22 line 1).

12. Claim 5 is rejected for the following reasons:

5. The system as claimed in claim 3, wherein the data correlations are parallel only (When the

search results do not include anything labeled sequential then the correlations are parallel only).

13. Claim 6 is rejected for the following reasons:

6. The system as claimed in claim 3, wherein the data correlations are both sequential and

parallel(When the search results include both sequential and non-sequential results).

14. Claim 7 is rejected for the following reasons:

7. The system as claimed in claim 1, wherein each data record has a data record owner (Col 10

lines 37-43).

15. Claim 8 is rejected for the following reasons:

8. The system as claimed in claim 7, wherein data management is enabled by the data

management module sending the verification results to the data record owners (Col 10 lines 44-

51 and invalidation requires the notification of the source to retrieve the new valid data)).

Art Unit: 2164

- 16. Claim 9 is rejected for the following reasons:
- 9. The system as claimed in claim 7, wherein data management is enabled by the data management module deleting the data records (Col 10 lines 44-51).
- 17. Claim 10 is rejected for the following reasons:
- 10. The system as claimed in claim 1, wherein the data records are stored in at least one database (Figures 1-4).
- 18. Claim 11 is rejected for the following reasons:

See claim 1 rejection.

19. Claim 12 is rejected for the following reasons:

See claim 2 rejection.

20. Claim 13 is rejected for the following reasons:

See claim 3 rejection.

21. Claim 14 is rejected for the following reasons:

See claim 4 rejection.

22. Claim 15 is rejected for the following reasons:

See claim 5 rejection.

23. Claim 16 is rejected for the following reasons:

See claim 6 rejection.

24. Claim 17 is rejected for the following reasons:

See claim 7 rejection.

25. Claim 18 is rejected for the following reasons:

See claim 8 rejection.

26. Claim 19 is rejected for the following reasons:

See claim 9 rejection.

27. Claim 20 is rejected for the following reasons:

See claim 10 rejection.

28. Claim 21 is rejected for the following reasons:

A database, comprising: a data storage module, storing a plurality of correlated data records, and a data operation module, coupled to the data storage module, operating the data records(Figure 4).

29. Claim 22 is rejected for the following reasons:

Application/Control Number: 10/666,503 Art Unit: 2164	Page 7
See claim 1 rejection.	

- Claim 23 is rejected for the following reasons: 30. See claim 2 rejection.
- Claim 24 is rejected for the following reasons: 31. See claim 3 rejection.
- Claim 25 is rejected for the following reasons: 32. See claim 4 rejection.
- Claim 26 is rejected for the following reasons: 33. See claim 5 rejection.
- Claim 27 is rejected for the following reasons: 34. See claim 6 rejection.
- Claim 28 is rejected for the following reasons: 35. See claim 7 rejection.
- Claim 29 is rejected for the following reasons: 36. See claim 8 rejection.

Art Unit: 2164

37. Claim 30 is rejected for the following reasons:

See claim 9 rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cory C. Bell whose telephone number is (571) 272 2736. The examiner can normally be reached on m-f 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Rones can be reached on (571) 272 4085. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
